

QONEQT — COMMUNITIES. CONTENT. CONNECTIONS.

Qoneqt is a community-first social platform where people discover communities, connect around shared interests, and create, share, and engage with content. It brings conversations, creators, and communities together in one connected experience.

For CTRL FREAK, this real product ecosystem becomes the starting point for an AI engineering challenge.

How can AI help create high-quality, engaging video content for the Qoneqt Global Feed at scale?

YOUR MISSION: DON'T JUST USE QONEQT. BUILD TECHNOLOGY FOR QONEQT.

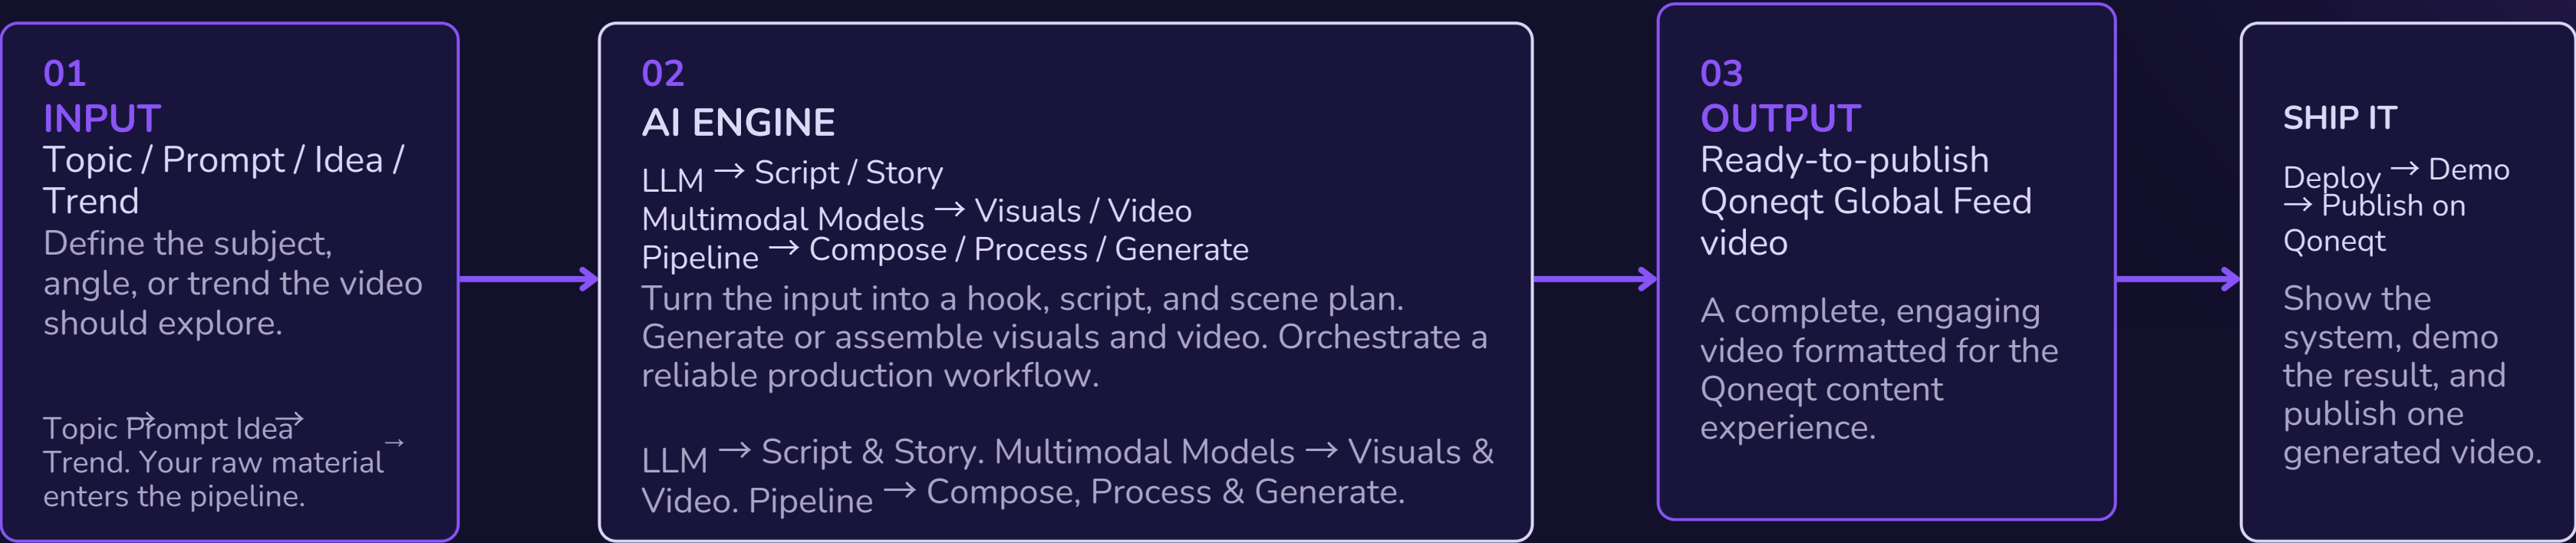

Build an LLM-Powered Content Pipeline for Qoneqt

Build an LLM-Powered Content Pipeline for Qoneqt.

Build and deploy an AI-powered system that transforms a topic, prompt, idea, or trend into engaging video content for the Qoneqt Global Feed. The pipeline combines LLMs for scripting and storytelling with visual and multimodal models for generating or processing visuals and video.

The goal is not a single generation. The goal is a repeatable pipeline that can produce publish-ready content at scale.

READY-TO-PUBLISH QONEQT GLOBAL FEED VIDEO. DEPLOY → DEMO → PUBLISH ON QONEQT. WE'RE NOT JUDGING A CONCEPT. WE'RE JUDGING WHAT YOU BUILD AND SHIP.
WE'RE NOT JUDGING A CONCEPT. WE'RE JUDGING WHAT YOU ACTUALLY BUILD AND SHIP.

QONEQT x CTRL FREAK

Build it. Ship it. Win it.

Build it.Shipit.
Win it.

₹10,000
